

**ONS Publishing Division Policy Regarding Letters to the Editor:** Selection of letters to be published in Letters to the Editor is the decision of the editor. For acceptance, letters must be signed. A letter can appear anonymously if requested by the author. All letters are subject to editing.

A letter that questions, criticizes, or responds to a previously published *Clinical Journal of Oncology Nursing* article automatically will be sent to the author of that article for a reply. This type of collegial exchange is encouraged. Letters that question, criticize, or respond to an Oncology Nursing Society (ONS) policy, product, or activity will appear in *ONS Connect* and automatically will be sent to the ONS Board of Directors for a reply. Send letters to [CJONeditor@ons.org](mailto:CJONeditor@ons.org).

## Evidence, Not Politics, Should Guide Cancer Care

I would like to thank the editor for her thoughtful editorial “Mammography and the Media” (vol. 14, p. 125). As oncology nurses, we are committed to advocating for all patients with cancer. As the author noted, we are supposed to be using evidence-based practice to drive the care we deliver. The updated guidelines were scientifically based and critiqued. Isn't that what we want for all cancer screening and treatment recommendations?

The editorial points out the need for oncology nurses to pay attention to the news because our patients will rely on us for information. In reality, they will likely listen to the oncology nurses administering their chemotherapy rather than a scientific or governmental report. Therefore, it is not only important that we pay attention, but that we don't allow politically unpopular scientific decisions in cancer sway our emotional opinions.

I commend Dr. Mayer's opinion. She has taken a brave stance on a politically sensitive issue with a politically vocal

group. I also commend the editors of the journal for taking a stand instead of ignoring the politically sensitive issue. It is this type of insight and journalism that keeps the Oncology Nursing Society and its membership informed and educated.

## ONS Journals Are Environmentally Friendly

The Oncology Nursing Society (ONS) takes care to minimize the impact of its publications on the environment.

- The *Clinical Journal of Oncology Nursing (CJON)* and *Oncology Nursing Forum (ONF)* are printed on 30% postconsumer recycled paper.
- The inks used to print the journals are SoySeal certified by the American Soybean Association. Soy ink is lower in volatile organic compounds (VOCs), making it less toxic during printing.
- The plastic bag that *CJON* and *ONF* are mailed in is recyclable. ONS uses the clear “polybag” to save significant postage costs. The polybag is type 4—LDPE—which is the type of plastic used for many shopping bags. Check your local chain grocery store for bins where you can drop polybags and shopping bags to be recycled.
- The printer of both journals recycles more than 50 million pounds of paper and paper products each year.

**When you are finished with your periodicals, please recycle them.**
